

# CASE STUDY

AET, a premier provider of advanced LED display technology, Delivering Custom Engineered LED Solutions for High-Stakes Government Centers

## PRODUCT INFORMATION

AET's NX COB P1.5mm displays with Koala modules were installed in a custom configuration. Featured unique LED columns with a 45° angle, enabling seamless corner coverage.

## CHALLENGES

The team needed to design a solution that could wrap around columns at a precise 45° angle, ensuring visual continuity and structural integrity while maintaining ultra-high image quality for a government situation center.

## REQUIREMENTS

The client required a high-reliability display solution capable of supporting real-time situational monitoring, delivering crisp visuals from oblique viewing angles, and reflecting the highest standards of quality befitting a presidential-level opening ceremony.
