

CASE STUDY

Legislative Excellence with Reliable, High-Impact Visual Technology.

AET, a global frontrunner in LED display solutions, was selected to equip the House of Representatives in Baguio, Philippines, with its advanced display technology.

PRODUCT INFORMATION

AET's NX COB P1.56mm displays were installed in an 18.17 m² area. Features COB technology for superior durability, contrast, and seamless viewing.

CHALLENGES

The team needed to deliver a high-reliability display capable of supporting lengthy legislative sessions, displaying critical documents and voting results with absolute clarity, and maintaining consistent performance without technical interruptions.

REQUIREMENTS

The House of Representatives required a professional-grade display solution to enhance legislative transparency, support real-time information sharing during plenary sessions, and project a dignified, technology-forward image befitting a government chamber.
