

CASE STUDY

Empowering Mission-Critical Operations with Ultra-High-Resolution Visuals.

AET, a trusted leader in LED display innovation, completed a high-precision installation in a control room in Dubai, United Arab Emirates.

PRODUCT INFORMATION

AET's NX COB P0.93mm displays were installed in a 14.62 m² area. Ultra-fine pitch COB technology for exceptional image clarity and reliability.

CHALLENGES

The team had to deliver a ultra-high-resolution display capable of presenting complex data streams and detailed maps with absolute clarity, while ensuring 24/7 operational reliability in a mission-critical control room environment.

REQUIREMENTS

The client required a high-performance display solution that minimizes eye strain during long monitoring shifts, supports multi-source signal inputs, and maintains consistent brightness and color accuracy under constant operation.
